

1 - Choose the correct answer from a , b , c or d :

1 - Fossil fuels are things like gas and oil .

a) sun. b) wind. c) water. d) coal

**2-When we burn fossil fuels a lot of.....is released into the
atomosphere**

a) oxygen. b) fresh air. c) carbon dioxide. d) water

3 - engeries run out .

a) Non - renewable b) Renewable. c) Wind. d) Solar

4 - engeries don't make pollution .

a) Non - renewable b) Renewable. c) fossil fuels. d) carbon dioxide

5 - A hot desert is a good place for energy .

a) tidal. b) wind. c) solar. d) coastal

6 - Fossil fuels make homes and bulidings

a) warm. b) cool. c) cold. d) snowy

7 - we can get renewable energies from sun and water

a) coal. b) wind. c) oil. d) gas

8 - Wind and turbines work by movement

a) coal. b) sun. c) wave. d) gas

9 - We need to get Of our energy from non-renewable sources

a) more. b) a lot of. c) much. d) less

10 - We need to get Of our energy from renewable sources

a) more. b) a lot of. c) much. d) less

11 - We can use tidal energy from the moving to make electricity

a) sun. b) water. c) panels. d) air

12 - In other places , it is very hot under the ground . these are good place for energy .

a) wind b) tidal. c) geothermal. d) air

13- A environment can get a lot of wind .

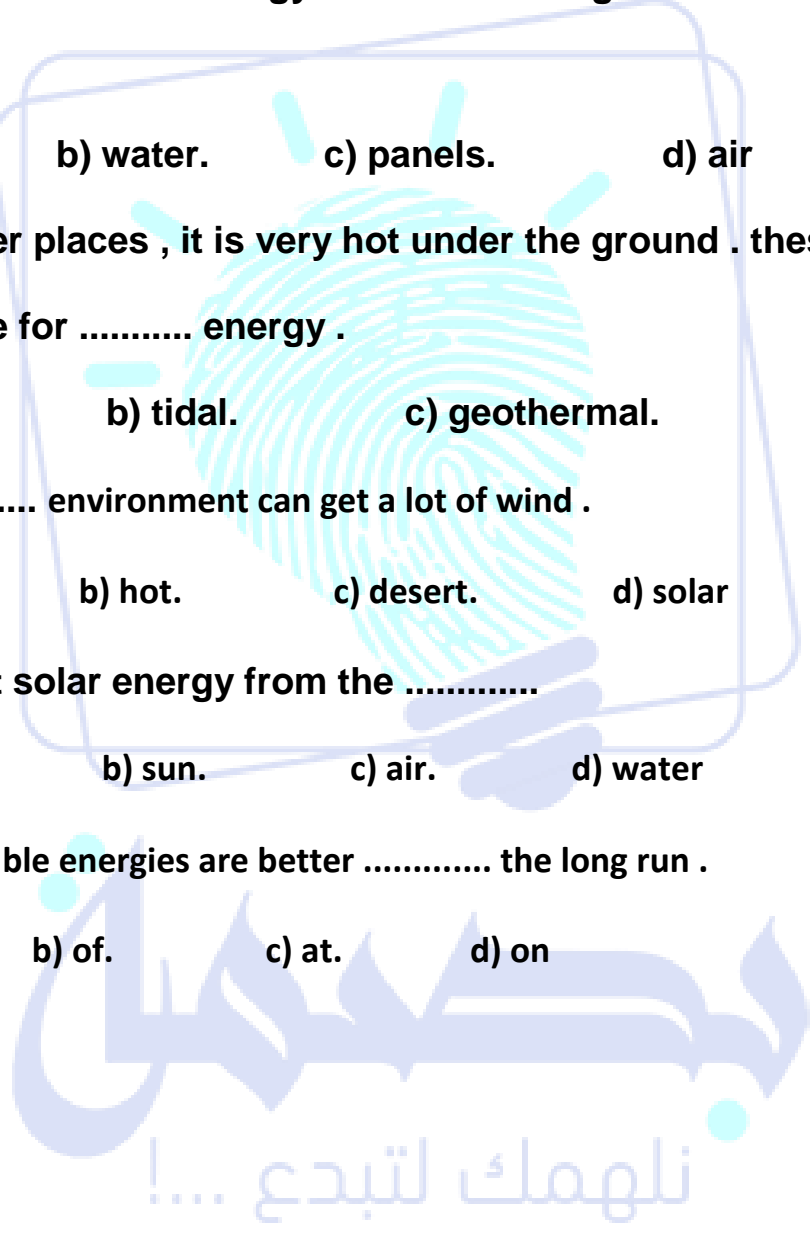

a) coastal. b) hot. c) desert. d) solar

14 - we get solar energy from the

a) river. b) sun. c) air. d) water

15 - Renewable energies are better the long run .

a) in. b) of. c) at. d) on

1 - Choose the correct answer from a , b , c or d :

1 - Fossil fuels are things like gas and oil .

- a) sun. b) wind. c) water. **d) coal**

2-When we burn fossil fuels a lot of.....is released into the atmosphere

- a) oxygen. b) fresh air. **c) carbon dioxide.** d) water

3 - engeries run out .

- a) Non - renewable** b) Renewable. c) Wind. d) Solar

4 - engeries don't make pollution .

- a) Non - renewable **b) Renewable.** c) fossil fuels. d) carbon dioxide

5 - A hot desert is a good place for energy .

- a) tidal. b) wind. **c) solar.** d) coastal

6 - Fossil fuels make homes and bulidings

- a) warm.** b) cool. c) cold. d) snowy

7 - we can get renewable energies from sun and water

- a) coal. **b) wind.** c) oil. d) gas

8 - Wind and turbines work by movement

- a) coal. b) sun. **c) wave.** d) gas

9 - We need to get Of our energy from non-renewable sources

a) more. b) a lot of. c) much. **d) less**

10 - We need to get Of our energy from renewable sources

a) more. b) a lot of. c) much. d) less

11 - We can use tidal energy from the moving to make electricity

a) sun. **b) water.** c) panels. d) air

12 - In other places , it is very hot under the ground . these are good place for energy .

a) wind b) tidal. **c) geothermal.** d) air

13- A environment can get a lot of wind .

a) coastal. b) hot. c) desert. d) solar

14 - we get solar energy from the

a) river. **b) sun.** c) air. d) water

15 - Renewable energies are better the long run .

a) in. b) of. c) at. **d) on**
